## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3727

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 - 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adell in view of Schneier.

It would have been obvious to one of ordinary skill in the art to have employed the planar side teaching set forth in Schneier in the construction of the container of Adell, when not employing a mounting bracket, motivated by the mold expense saved by such construction. The container dimensions, material of construction, and number of containers fittable within a box are obvious matters of choice with the device of Adell as modified above by Schneier. To have employed injection blow molding in the construction of the device of Adell would have been obvious to one of ordinary skill in the art in view of the wide acceptance of such in the plastic container field. The method claimed would have been an obvious method for the above set forth device in view of the intended use.
